Mr. J. Pavitt, Inspector  
Alaska Operations Office  
U.S. Environmental Protection Agency  
222 W. 7th Avenue, #19  
Anchorage, Alaska 99513

Dear Mr. Pavitt:

**REQUEST FOR HANFORD ONSITE WASTE TRACKING FORMS**

Pursuant to the verbal request you made to representatives of the U.S. Department of Energy Richland Operations Office while conducting a compliance inspection at the Hanford Site on August 8, 2012, please find enclosed herewith a compact disc containing Onsite Waste Tracking Forms (OWTFs) for certain asbestos remediation wastes.

The files on the enclosed compact disc contain the following:

File #1 has a list of 523 OWTFs that have building debris, are not marked asbestos, and are not U.S. Department of Transportation (DOT) regulated. The file includes copies of the original completed OWTFs.

File #2 has a list of 53 OWTFs that have building debris with asbestos in the proper shipping name (block 20) and shows a block 5 "other" as asbestos debris. However, because these are from the Waste Management Information System electronic database (and are not completed forms), subsequent hand entries do not appear (e.g., signatures, some checked boxes, etc.). They are DOT regulated. All files are believed to have been previously provided to the U.S. Environmental Protection Agency's Hanford Project Office. The first page of File #2 also contains a summary page of what all three files contain. All the files have information about the waste source (284W) and point of origin Codes: 200-W\*302274 (shipments performed between May 25, 2011 to November 11, 2011) or TPLNTZONE\*302547 (shipments made between January and September 2011).

File #3 has a list of 356 OWTFs that have building debris, are marked as asbestos, and are not DOT regulated. The file includes copies of the original completed OWTFs.

SEP 05 2012

Mr. J. Pavitt
